

VACANCY: Project manager IT

Who are we?

Energy Solutions Group is at the forefront of the energy transition in the Benelux region. Our mission is to create a lasting impact on the energy transition while simultaneously meeting the growing energy needs of our society in a responsible and sustainable manner. In Belgium and the Netherlands, we operate over 350 renewable energy parks featuring solar energy, wind energy, Electric Vehicle charging infrastructure, and energy storage. Our ambition is substantial, and we plan to significantly expand our portfolio in the near future. Together with 40 colleagues, we work in Belgium and the Netherlands on groundbreaking projects in the field of sustainable energy. We offer you an invigorating work environment and the opportunity to make a positive impact on our planet.

About the position:

The IT Project Manager will oversee the planning, execution, and completion of IT-related projects, with a secondary focus on corporate change initiatives. This role requires a strategic thinker with strong project management skills and the ability to manage multiple projects simultaneously. The Project Manager will collaborate with cross-functional teams, stakeholders and vendors/consultants to ensure projects are delivered on time, within scope, and within budget.

Key Responsibilities:

- **Project Planning and Management:**
 - Define project scope, objectives, and deliverables in collaboration with senior management and stakeholders.
 - Develop comprehensive project plans, including timelines, milestones, and resource allocation.
 - Ensure that projects are delivered on time, within scope, and within budget.
 - Report and escalate issues to management as needed.
 - Coordinate internal resources and third parties/vendors for flawless execution of projects.
- **Stakeholder Management:**
 - Manage stakeholder expectations through clear and continuous communication.
 - Prepare and present project reports to senior management and other stakeholders.
 - Ensure that stakeholder needs are met as projects evolve.
- **Corporate Change Projects:**
 - Define and manage the scope, goals, and deliverables of corporate change projects.
 - Develop and implement strategies to ensure successful adoption of changes across the organization.
 - Coordinate with various departments to ensure alignment and integration of corporate change initiatives.

Skills and Qualifications:

- A Bachelors or Master's degree in engineering or a related field is required.
- 5+ years of project management experience, with a primary focus on IT projects.
- Excellent written and verbal communication skills.
- Strong leadership, organizational, and multitasking skills.
- Proficiency in both Agile and Waterfall project management methodologies.
- Ability to work effectively with all levels of the organization.
- Demonstrated problem-solving skills and ability to work under pressure.
- Experience in vendor management and contract negotiation.

We offer:

- Competitive compensation package based on your experience.
- Performance related bonus.
- A full-time role (40 hours per week).
- Flexible work schedule and remote work options.
- Opportunities for professional development and continuing education.
- Collaborative and inclusive work environment.

Location: Energy Solutions Group HQ – De Lange Beemden 14.1, 3550 Heusden-Zolder (BE).
